Advanced Reliability with Low Power Consumption Open Frame XF2B

High Brightness XF2B is a new outdoor signage, that can be utilized as a digital banner on outdoor kiosks near stations or buildings. It guarantees stability when exposed to external high temperatures and effectively reduces costs with a space-efficient design and low power consumption.

Key Features

High brightness Reliability

Over time, the brightness decreases depending on operating time. However, the LG XF2B sustains its brightness for a long time.

NE REAL

Dust & Humidity Protection

The conformal coating enhances circuit board reliability by protecting it from dust, iron shavings, humidity and other harsh conditions.

Cost Effectiveness

Low Power Consumption by M+ It has excellent energy-efficiency and cost-savings with the M+ panel, which decreases power consumption by 37% compared to the RGB panel.

Cost Effective Housing

Its high reliability under high operating temperatures reduces the material costs of the enclosure.

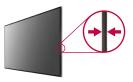

Space Management Efficiency

Slim

The slimmer depth saves space for installation and makes the enclosure design slimmer.

Real-Time Remote Monitoring

EOO

When an alarm occurs, an e-mail notification is sent using SuperSign C or SI SW through the SNMP Protocol. In case of malfunctions or errors, real-time remote care is available.

Saving System Log Files

Supports log file backup for fault clarification when the enclosure fails. It is convenient for the user to check the log file history for proof when enclosure errors occur.

XF2B

- Brightness : 2,500cd/m² (Typ)
- Life Time: 50,000hrs
- Bezel : 55" : 9.9mm (L/R), 12mm (T/B)
 - 49": 6.5mm (L/R), 9mm (T/B)
- Depth : 55" : 106mm, 49" : 105mm
- Operating Temp. : 32 ~ 122 °F (w/o Direct Sunlight),

32 ~ 104°F (Direct Sunlight)

• Interface : HDMI / DVI / RJ45 / IR / Daisy-Chain (DP, RS232C)
